

THE TECH

VOL. XXXIII. NO. 17

BOSTON, MASS., FRIDAY, APRIL 25, 1913

PRICE TWO CENTS

CANDIDATES FOR "THE TECH" MEET TODAY

Members of Staff to Explain Work and Opportunities to New Men.

At 1.30 today the candidates for the various departments of THE TECH will meet in the Lower Office. It has been decided to hold this meeting at this time of the year to give men a chance to come out and make the paper before the final exams. This opportunity is unprecedented in former years. The opening is especially favorable to Freshmen who have not come out for a big activity, and it gives them a chance to avail themselves of something which they cannot afford to lose.

The business department offers an especially large field for new men. There are now excellent chances to make good in either the advertising or the circulation departments as candidates for assistants to the respective managers, offices which will soon be filled from the new men.

In the news departments the advantages are greater than ever. With the present standard which the paper is trying to maintain a greater number of men are needed to carry on the work, for more emphasis is being put on quality of work than on quantity. The amount of work done by the individual is comparatively small, but the experience that comes from this work is of greater value.

If you are at all interested in the progress of the biggest activity in the Institute attend the meeting and hear what men on the paper have to say. The meeting is held at a time convenient for all, 1.30 this noon, in the Lower Office of THE TECH.

FOREIGN STUDENTS.

Dr. Rua, of Argentina, to Address Latin-American Students.

This afternoon, at 5 o'clock, in one of the smaller rooms in the Union, a meeting of all Latin-American students will be held. Dr. Jose M. Rua, Professor of Biology at a college in Buenos Ayres, Argentina, will be present and he will address the men. This meeting, which is to be held under the auspices of the Technology Christian Association, is open to all Latin-American students. The welcome has been extended to all such students at Harvard University and at other schools in the city. The number of students from the Central and South American Republics and countries here at the Institute and at other colleges is quite large, and it is hoped that all will attend. Those in charge of the meeting think that Dr. Rua's talk will be of interest to all.

BROTHERHOOD DINNER.

Next Tuesday, April 29, the Technology Chapter of the Brotherhood of Saint Andrew will give a dinner at the Trinity House, 22 St. James avenue. The dinner, to which all Tech Episcopatians are invited, will be held at 6.30. Mr. Parson will address those present after the dinner.

With the good weather the last few days baseball has taken a big advance. The various teams are rounding into excellent form.

TALK ON WORLD PEACE GIVEN YESTERDAY

Mr. E. Privat Tells How American Students Can Help Peace Movement.

The men who gathered in the Union yesterday during the noon hour were given an unusual treat in the talk on "The World's Students and Their Powers for Peace" by M. Edmond Privat, a well known scholar and lecturer for the World Peace Foundation. Mr. Privat is a graduate of Geneva University, and at present he is making a tour of the United States, lecturing on the advancement of peace. In spite of the fact that he is a Swiss and that his native tongue is French, he speaks English fluently, and his talk yesterday was interesting and very well received.

Mr. Privat first spoke of his experiences with students in various European universities and he said that great enthusiasm for the peace movement exists among them. The European students look upon the American students as examples, and they consider them as foremost in cosmopolitan and international movements. The trouble with the students on the continent is that they do not exchange their cosmopolitan ideals enough. For these reasons Institute men, as students in a leading college and as future engineers and holders of prominent positions in the world, can play an important part in the furthering of peace.

The reason for the continued unrest among the various nations and for their continual increase in armament and navies is the activity of leading business concerns in launching this spirit of enmity by constantly suggesting various improvements. As an instance of this Mr. Privat cited the recent circumstances in France, where a manufacturing establishment suggested the necessity of increased safety against Germany, and immediately the public carried out the suggestion by presenting large numbers of aeroplanes to the government. The speaker stated that it was disgusting to think that such a movement should have been started by a business concern.

NAVAL SOCIETY MEETS.

H. K. Chow Describes Chinese Craft—Shingles to Be Made.

At 4.15 P. M., yesterday afternoon, the Naval Architectural Society held its regular meeting in 32 C. The meeting was called to order by President Constable, and after the necessary preliminaries had been gone through a discussion was held on the shingles which are to be made up for the members of the society. It was decided that the shingle previously used by the society should be utilized and that a sufficient number be printed at MacLachlan's to furnish all men desiring them. The next matter brought up was that of the annual banquet, to be held in the middle of next month. Walbridge was appointed to obtain the rates of the various downtown hotels and to furnish a complete report at the next meeting. This meeting is to be held on May 8th, at 4 P. M., in 32 Eng. C.

After all business matters had been attended to the members were given a very interesting talk on "Chinese Sailing Craft" by H. K. Chow.

SOPHOMORES PLAY RINDGE HIGH SCHOOL

Final Score 7 to 5 in Favor of Rindge—Delano Replaces Sears in Sixth.

Yesterday afternoon the Sophomore baseball team met the Rindge Technical High School nine on the Rindge field in Cambridge. The game was closely contested, the final score being 7 to 5 in favor of Rindge.

The game opened with 1915 at the bat. No runs were made in the first inning. Rindge scored in the second on an error, but no hits were made until the fourth inning, when Rindge made three singles, which brought in two runs. The fifth found Langdon on third with only one out. The chances looked good for a score for the Sophs, but two feeble hits wound up the first half of the inning with no runs. Messenger, of Rindge, started things in the ending of the fifth by knocking a three-bagger, which he stretched into a home run by an error, and followed Kenney across the plate.

In the first of the sixth Hall beat out an infield hit. McIntyre, batting for Sears, was next up. He was hit by a pitched ball, advancing Hall to second. A wild throw by the Rindge pitcher in an attempt to catch Hall on second, advanced Hall to third and McIntyre to second. Morse next flied to Kelley. Franks made a hit to center, scoring Hall and McIntyre, but was caught between second and third. Caffrey grounded out. The ending of the sixth found Rindge with the bases full and two gone. A single by White scored two runs.

In the seventh Langdon drove a beautiful hit to deep center, making a home run. Bauer followed with a single and Place flied out. A caught (Continued to Page 3, Col.)

ANNOUNCEMENTS MAILED

Notice of Degrees Not Given Out at Senior Dinner.

It has been informally decided by Professor Merrill, Secretary of the Faculty, that announcements of the granting of degrees to the Seniors will be mailed to them as soon as determined upon. This will be sometime during the afternoon or evening of the day on which the class dinner is held.

It has been the custom in past years to give out the announcements at the class dinner, which added somewhat to the excitement of the occasion. It is not yet known whether the Seniors, as a body, will welcome the new arrangement or not, but several have expressed their strong disapproval.

Arrangements may possibly be made to send the special announcements by special delivery if the Seniors desire it.

MR. PRIVAT TO TALK.

Edmond Privat, the advocate of International Unity and Peace, whose talk yesterday in the Union greatly pleased all who heard him, will deliver another lecture on Saturday night, April 26, at 8 P. M., in the lecture room of the Boston Public Library. It is safe to say that he will again reveal some startling facts in his talk. Institute students are urged to attend the lecture.

SPRING INTERCLASS MEET TOMORROW

Close Score and Interesting Races Expected at Annual Event.

The Spring meet, which comes tomorrow, promises to be one of the most interesting in recent years. The Freshman class has added a lot of life to the track. Not only this, but the strength of the Junior class makes the competition of unusual interest. Although the Freshmen won the dual lower class meet there is little reason to expect that they will capture the Spring meet. In the dual meet they swept the dashes, but tomorrow there will be both Wilson and Wilkins to contend with. They captured the half and the mile, but it is doubtful if they can duplicate this performance. In the half, Eddie Germain, notwithstanding his recent illness, will probably show the way to Guethling, who should make a good second. In the mile, C. H. Wilkins will be among the leaders, with both Benson and Wall close contenders for the first place. (Continued to Page 3, Col.)

INSTITUTE COMMITTEE.

Proposed Changes in Membership to Be Discussed.

The Institute Committee will meet at 4.15 today, in Room 8, Eng. C. The Executive Committee wants all of the members to be present or to send a representative, on account of the importance of the business which is to be transacted.

The committee on the Constitution and By-Laws will present a report of the objections of the students to the new Constitution of the Institute Committee. These objections are, for the most part to the representation on the committee. Members of activities whose right to membership on the committee has been questioned are earnestly urged by the committee to be present and to present their side of the question.

There will be discussion and possibly action taken towards securing a more efficient co-operative society than we have at present.

Steps will also be taken to secure some means of securing better attendance of the members at the meetings of the committee.

Reports are to be received from the Treasurer of the committee and the Tech Show Advisory Council.

The committee urges any who desire to express their views on any of the subjects named above to be present.

THE WEATHER.

Forecast for Boston and vicinity: Unsettled; light to moderate variable winds.

CALENDAR.

Friday, April 25, 1913.
5.00—Meeting Foreign Students—Union.

Saturday, April 26, 1913.
12.00—Debating Class.
12.00—Co-operative Society.

FRIDAY, APRIL 25, 1913

The lack of interest shown by the student body in efforts for their own direct benefit is appalling. Some time ago a committee, headed by Professor Robinson, undertook to ascertain from the students' point of view where the allotment of time for preparation of work needed revising; accordingly, cards were sent out with the request that all regularly classified students record approximately the actual time spent on each subject. To date less than forty per cent. of the cards have been returned.

The Faculty, of course, is interested in this matter only for the sake of the students. It would seem that the latter should be vitally concerned on their own behalf. We often hear sarcastic remarks about the iniquity of the scheduled time apportionment, but now that an opportunity is offered to rectify it, less than half of us are willing to spend ten minutes on the matter.

Every Tech man should hunt up his card or get a new one, and fill it out to the best of his ability.

Now that the warm weather has come it is natural that all men begin to loll back in their chairs and dream pleasant dreams of vacation days to come. This is all very well under certain conditions, and the chief of these conditions is that school work be done before the pleasurable dreaming is indulged in. The inclination is to dream first and do the work after. We all know what the result of such a method of procedure is. It might not be inappropriate to mention at this point that the Faculty is also acquainted with said results.

There is a very simple remedy for this tendency to loaf, and it is a remedy which every man can apply with beneficial results, not only for himself, but also for the Institute. Did you ever hear the old proverb which states that the more a man has to do the more he can do? Just apply it to yourself. Go out for some activity or get into some sport which takes up a good slice of time, or, if you have no desires in these direc-

ATHLETIC ADVISORY COUNCIL MEETING

Members of Hockey and Wrestling Teams Awarded Insignia For Season's Work.

At a recent meeting of the Advisory Council on Athletics, held in the Hotel Puritan, Dr. Rockwell, Major Briggs and R. C. Thompson were present. After the records of the previous meeting had been read and approved a report of the meeting of the M. I. T. A. A. was presented. A recommendation in this report that C. T. Rogers and C. L. Foote of the hockey team be awarded an "HTT" as they had played in two-thirds or more of the regular schedule games, was approved.

A recommendation that R. Saier, J. C. Kelley, H. W. Treat and C. P. Walters be awarded a "WTC" for winning bouts in the match with Harvard was granted, with the suggestion that more college meets be held next year by the wrestling team.

Another recommendation that a "ATA" be granted to C. A. Blodgett, as manager of the wrestling team, was disapproved, but a vote was passed that a "WTT" be awarded to him as manager.

M. E. S. MEETING.

Mr. J. F. Macdonald to Address Members in 11 B.

This afternoon, at 4.10, the Mechanical Engineering Society will meet in 11 Eng. B to hear Mr. J. F. Macdonald, who will address them on "Modern Boiler Making Practice." Mr. Macdonald is connected with the International Engineering Company of South Framingham, which was formerly the Robb Engineering Works, and is exceptionally well fitted to talk on his subject. This talk, while of interest to all Course II men, is of especial interest to the members of the third year sections, as it deals with the kind of work they are now studying. The meeting is open to men of all courses and a large attendance is expected.

The Freshman class voted the Cotton Manufacturers their heartfelt thanks for using Huntington Hall from 10 to 11 Wednesday.

Not much spare cash around just now, after that awful week. We just tried to borrow a quarter.

Deep sorrow among the infants, they missed a U. S. lecture.

Redouble your efforts on your studies. Now is a good time to get right down to work and do some good solid "plugging." The examinations are only a few weeks off, and every spare minute put in now reduces your anxiety just so much.

In regard to the question of activities do not think that it is too late in the year to begin work. It is never too late to begin, and the man who takes up the work in some worthy cause now will find himself disproportionately advanced at the beginning of next term. He will have learned the "ropes" and will have discovered the most efficient way of getting the desired results in connection with his work. As a result he will be in direct line for advancement at the beginning of the next school year, and will have served his apprenticeship at a time when it will do him the most good so far as preventing the catching of the deadly "spring fever" is concerned. Get busy, fellows, and stay busy, and you will find that you will not have any inclination to yield to the seductive influences of the warm weather and will come through your examinations in a way impossible to the man who sits and dreams and does not do.

SPRING MEET.

(Continued from Page 1.)
patronized and will be of more than passing interest. Capt. Nye, of the cross-country team, will have Cook to beat, while Graff is liable to upset calculations and finish in the front rank. In the hurdles, the points will be divided between the Juniors, with Huff, and the Sophomores with Curtis and Foster. The Juniors are strong in the high jump, with Hall and McKinnon, while Teeson ought to give the Sophomores some points.

The Sophomores, on the other hand, will not score as much, for the upper-class men will undoubtedly get several firsts with McCloud and McNeil in the discus and shot. The Sophomores expect to win the hammer with Conway, but the broad jump will probably go to the three other classes. From the present outlook it seems as if the class supremacy will go either to the Juniors or the Freshmen, with the other two classes close on their heels.

RESEARCH STUDY OF FREIGHT HANDLING

Paper Written by Tech Professors Will Show Reduction in Loss of Time.

Tonight, at 7.30, in 6 Lowell, the Boston Section of Electrical Engineers, the Boston Section of the American Society of Mechanical Engineers, and the Boston Society of Civil Engineers will hold a joint meeting to discuss the present system of handling freight at the Boston Freight Terminal, with a view to reduce the loss in time. Dr. Harold Pender, H. F. Thomson and C. P. Eldred of the Electrical Engineering Department, have made a research study of freight handling and will have interesting facts to present at the meeting in the form of a written paper, "The Delivery and Handling of Freight at the Boston Freight Terminal," which has been written by them for this occasion.

The paper will contain an interesting comparison between delays by teamsters at the railroad yards and delays at the warehouses, and also a comparison between the Chicago and New York yards. It will also point out the recent improvements in the operation of the Boston freight house and the saving in time which they give the "master teamsters." These improvements have been instituted by the railroads to eliminate certain portions of waste of time.

The study of this industrial economy is made possible in the Institute through a fund given by the New Haven and Boston and Maine Railroad Companies.

Besides the discussion there will be numerous stereopticon views of normal and congested conditions in Boston. A number of railroad officials and many of the "master teamsters" will be present at the discussion. The public is welcome.

RINDGE-SOPH GAME.

(Continued from Page 1.)
foul fly advanced Bauer to second. He was caught napping between second and third, making the third out. Rindge finished up the inning by knocking out a grounder and two flies.

The eighth started well, Delano reaching first on an error. He was forced by Morse, who succeeded in stealing second and third, and reached home on Franks' ground ball to the pitcher. Franks was caught stealing; Spencer reached first on an error. Poitras made a beautiful catch of Caffrey's line drive to centre, making the third out. With Rindge at the bat, Sullivan was walked, stole second and went to third on Sylvester's tap to first. Bauer threw to third, allowing Sylvester the base. The inning was ended by a double out. Langdon started the ninth with a walk. McIntyre doubled and went to third on Langdon's out at the plate, scoring on Place's ground ball. Hall forced Place, and the next man walked. Morse filed out, which finished the game. The lineup was as follows:

1915.
Rindge.
Bears, Delano, p.....p. McCrehan
Hall, c.....c. Sullivan
Bauer, 1b.....1b Harvey
Franks, 2b.....2b. Kenny
Langdon, 3b.....3b. Kelly
Caffrey, ss.....ss. White
Spencer, c.f.....c.f. Poitras
Place, r.f.....r.f. Messenger
Morse, l.f.....l.f. Sylvester

T. C. A. TALK.
(Continued from Page 1.)

cern, and said that Tech men, as future and influential men in a leading profession, will have the power to suppress such actions. In doing so they can do more for the advancement of peace than possibly in any other way.

The fact that American students are leaders in the great student peace movement is the result of their large number of cosmopolitan clubs, where men from all nations meet and exchange their views of international peace, thus benefiting one another mutually. In the eyes of the European students the United States stands for justice and peace, and the speaker said that by their directive influence and strong character American students can teach the European students their ideals of peace and its advancement. By personal contact and influence in later years and in business relations with foreign men the students of today can do much towards this peace movement.

To further the great student peace work a conference will be held at Cornell next September, according to Mr. Privat, of all the cosmopolitan clubs of the United States, and of the few in existence abroad. In Europe, the speaker said, clubs of such a liberal cosmopolitan nature were scarce, due to the intense spirit existing between the different nations, and it is only recently that this student peace movement has been aided considerably by

the establishment of such clubs and societies. Cosmopolitan clubs have been successfully formed in various universities of Germany and France, between which two countries the strongest spirit exists, and this has marked one of the greatest successes of the peace movement.

What American students, as future men of prominence and power, can do, Mr. Privat suggested, is to resist constantly the many temptations to promote enmity and war, and by the sheer force of their will and character, to prevent any actions that would tend to injure or retard the great world peace movement. Mr. Privat said that he recently met President Wilson, and Mr. W. J. Bryan of the Cabinet, and that these two men, as representatives of the administration, stated that the question of the advancement of peace would be one of the most important points to be considered. In closing, Mr. Privat said that he hoped that Tech men would keep this peace question in mind and would do all in their power to help this world-wide peace movement.

The last meeting and talk of the year will be held next Thursday, May 1st, when Rev. Allan A. Stockdale, of the Union Congregational Church of this city, will answer the questions asked by any of the men. The Association desires every man who wishes to ask any questions to hand them to any of the society's officers as soon as possible. The last talk will undoubtedly prove to be extremely interesting.
